

Artificial Caviars

Artificial caviar poses no limits for the imagination. Turning all types of liquids into liquid-filled pearls allows to create an extraordinary mouthfeel experience. Try this recipe with oyster for a mind-blowing entree!

Ingredients

Solution A

Satialgine® S 900 NS	1%
Balsamic vinegar	Up to 100
Preservative	As required

Solution B

Calcium lactate	2%
Water	Up to 100

Recipe

1. Disperse Satialgine S 900 NS into balsamic vinegar
2. Maintain stirring until an homogeneous.
3. Add all the other compounds if required
4. Pour droplets of solution A into solution B to form small beads
5. Rinse the beads with water.
6. Place them on oysters
